**Subject:** eight mile creek road florence

My wife and I urge you to go with the long term solution to fix 8 mile creek road. You have an offer from a developer to pay for the majority of the repaving of 8 mile creek road. If you haven't been on the road lately it is falling apart. It WILL NOT make it to 2011 for the county to repave it. Chip sealing and filling potholes is simply wasting money. The pothole repairs last less than a month before they start eroding again. This waste of money has gone on for years and is the equivalent of putting a wad of chewing gum in a hole on a dam. If you look at the road it is cracked over the course of the whole thing - even where there are no potholes. The whole road is ready to fall apart and large sections already have. **FIX THE ROAD!!!!!!** Don't waste OUR taxpayer money on chip sealing and temporary fixes.
